## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to network gateway, classified in class 370, subclass 401 (Bridge or Gateway Between Networks).
  - II. Claims 10-14 & 28, drawn to a method and apparatus of providing subscriber information for a mobile unit subscribed to a primary network roaming in secondary network, classified in class 370, subclass 331 (Hand-off control).
  - III. Claims 15-27, drawn to a method of sending data from mobile unit through a wireless circuit switched or packet switched network, classified in class 370, subclass 352 (Combined Circuit Switching and Packet Switching).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as gateway between networks. See MPEP § 806.05(d).
3. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention I has separate utility such as gateway between networks. See MPEP § 806.05(d).

4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as o a method and apparatus of providing subscriber information for a mobile unit subscribed to a primary network roaming in secondary network. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Hans Mahr (Reg. No. 46,138) on 02/15/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
